About Us

BITUMAX, established in 2011, is a reputable and professionally managed business organization with strong business ethics. We operate in the fields of Petroleum, Petrochemicals, and General Products, with offices located in Kenya, UAE, Turkey, US. We take pride in our position as leaders in the dynamic world of Petroleum and Petrochemicals, and we are committed to supplying a diverse range of commodities that not only meet current market requirements but also anticipate future demands.

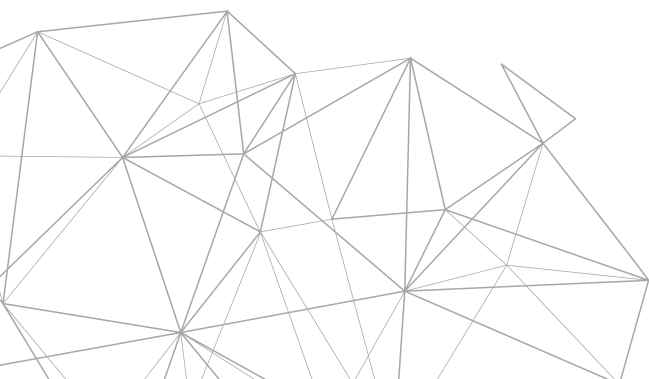

our mission at **BITUMAX** is to deliver competitive products that provide both quality and value to our customers. We strive to ensure timely deliveries of top-notch products at competitive prices. Our business dealings are conducted with utmost honesty and integrity, and we foster a culture of commitment and accountability among our staff members at all levels. We maintain a unique corporate culture that encourages thinking outside the box and embraces a proactive "can-do" attitude. With a global market presence, we have established operations in numerous countries including America, India, China, Southeast Asia, East Africa, the CIS and Balkan regions, Latin America, Turkey, and various European countries. In the realm of Polymers and Plastics,

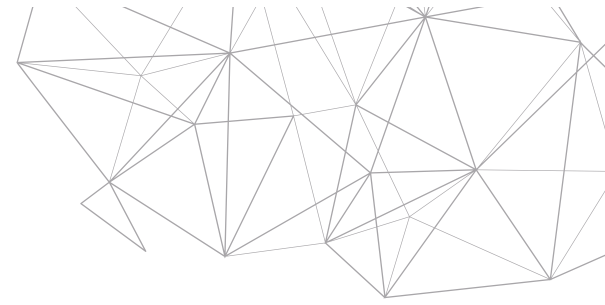

BITUMAX has garnered a strong reputation as a prominent company in the market. Our monthly supply capacity reaches up to 5,000 MT of products. We offer a wide range of grades, including LDPE, HDPE, LLDPE, PP, GPPS, EPS, SBR, PBR, ABS, Recycled PE, and more. Leveraging our experience in supplying bitumen since 2011 in East Africa, we have expanded our capabilities to meet the demand for bagged bitumen in different markets.

Vision

Our achievements in the market stem from our comprehensive and well-coordinated approach to experienced company management. This includes implementing an effective marketing strategy, delivering products of high quality, establishing efficient logistic channels, driving innovative company developments, and employing a knowledgeable and skilled staff. These factors collectively contribute to our distinction as one of the leading companies in the fields of Petrochemicals, and Petroleum.

AFRICA

BITUMAX, established in 2011, office started as a bitumen supplier in the domestic Kenyan market

BITUMAX entered in petrochemical products. We aim to expand overseas markets in East Africa and provide direct access with our valued customers.

BITUMAX products are of high quality, imported, and stored in warehouses in Nairobi & Mombasa. We are in a position to offer our products based on the Kenyan Shilling with a variety of payment methods through African banks. Thanks to our experienced experts in **BITUMAX**, we are able to import cargos in the Kenyan Port within a very short time and deliver the cargo to any city in the region.

BITUMAX also plans to venture into further markets in Africa continent such as Angola, Cameroon, Ghana, Congo, Mozambique, Tanzania, Madagascar, and many other neighboring countries through **BITUMAX** office located in Nairobi.

BITUMEN

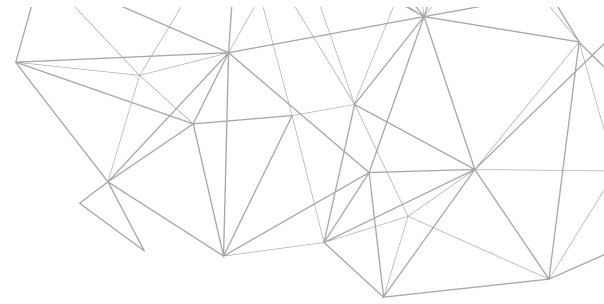

AIR Blowing Bitumen:

The Air Blowing Bitumen is produced by process of Vacuum Bottom (VB) and air in thereactor. and due to the control of the process conditions, different grades are produced. 40/50" due to its medium air blowing and penetration, is used in tropical areas. 60/70" due to its medium air blowing and penetration, is used in mild areas. 80/100" due to its relatively low air blowing and penetration, is used in cold areas.

Package:

Drum: 180 and 150 KG inside containers Jumbo Bag: Jumbo bags are palletized and would be placed inside the metal boxes which protect the bags against any damages. Bulk: up to 10,000 MT on bulk vessel

Oxidized Bitumen

Oxidized Bitumen or Blown bitumen grades are produced by passing air through the penetration grades.

This process gives the bitumen rubberier properties than its original formula and they are simply harder bitumen.

Package:

- Palatized Carton Box
- Craft Bags

Polymer Modified Bitumen

PMB consists of bitumen blended with a synthetic polymer or crumb rubber. PMBs are used to enhance the performance of binders on heavily trafficked or distressed pavement surfaces, often in adverse climatic conditions.

Package:

- Drum: 180 KG
- Jumbo Bag: Jumbo bags are palletized and would be placed inside the metal boxes which protect the bags against any damages.

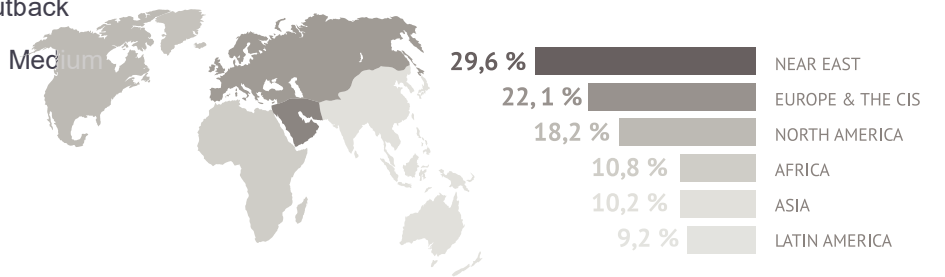

Cutback Bitumen

Cutback Bitumen is by adding controlled amounts of petroleum solvent such as Kerosene Gasoil and Gasoline. Base on reduce of bitumen viscosity for spraying in ambient temperature Pavement Construction, Maintenance, Prime and Tack Coating.

Base on the time of curing after spraying, Cutback bitumen classification as Rapid Curing (RC), Medium Curing (MC) and Slow Curing (SC).

- MC-30
- MC-70
- MC-3000

Viscosity Bitumen

Viscosity Grade | VG

Viscosity grades Bitumen are categorized according to Viscosity (degree of fluidity) grading.

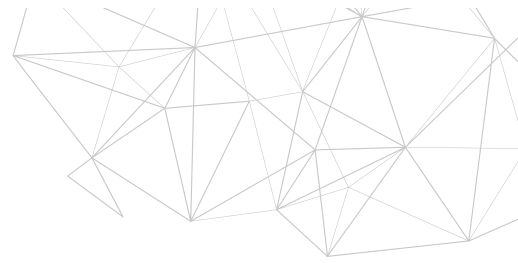

The higher the grade, stiffer Bitumen.

- VG30
- VG40

Package:

- Drum: 180 and 150 KG inside containers
- Jumbo Bag: Jumbo bags are palletized and would be placed inside the metal boxes which protect the bags against any damages.
- Bulk

POLYMERS

POLYETHYLENE:

It is the most widely used plastic in the world, being made into products ranging from clear food wrap and shopping bags to detergent bottles and automobile fuel tanks.

HDPE, MDPE, LDPE, LLDPE, ABS, SBR,

POLYSTYRENE:

It is widely used to protect consumer products. DVD cases, food packaging, meat/poultry trays and egg cartons typically are made with polystyrene to protect against damage or spoilage

- GPP

CHEMICAL:

TDI (Toluene Diisocyanate)

TDI 80-20 is mainly used in the production of polyurethane foam and other polyurethane products including elastomers,

WHITE SPIRIT

is used in paints, coatings, waxes, varnishes, adhesives, printing inks and liquid photocopier toners.

THINNER

is a volatile solvent that is used to dilute or extend oil-based paints or cleanup after use

METHANOL

also used as an industrial solvent for inks, resins, adhesives, paints, plastics and dyes

RESIN

Resin art is created when a runny chemical called epoxy resin is combined with various colour pigments and additives to produce a blend of unique patterns and textures.

RPO (Rubber Process Oil)

products are used as a component in rubber formulations for the manufacturing of rubber products. Such products are tires, rubber bands,

LABSA

is a widely used industrial detergent. It is used in washing powder, detergent powder,

TEG (Tri Ethylene Glycol)

is used in the manufacture of a host of consumer products that include anti-freeze,

MEG (Mono Ethylene Glycol)

is most commonly used as chemical intermediate in the manufacture of polyester resins and textile fibers.

DEG (Diethylene Glycol)

is a clear liquid that can be used as a solvent for lacquer, paint and varnish,

FERTALIZER

UREA 46%:

Urea, also known as carbamide is one of the common fertilizers in the world. More than 90% of world industrial production of urea is destined for use as a nitrogen-release fertilizer. Urea has the highest nitrogen content of all solid nitrogenous fertilizers in common use. Therefore, it has a low transportation costs per unit of nitrogen nutrient.

Packing:

- 50kg Bag Repack in Jumbo Bag
- Palletized 50kg Bag
- Bulk In Jumbo Bag
- Bulk

BITUMAX is in position to offer 2 types of Urea 46% as follows:

- Urea 46% Granular
- Urea 46% Prilled

SULFUR (SULPHUR)

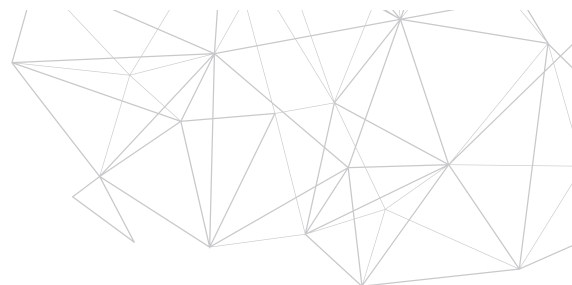

Sulfur is one of the most important agricultural and industrial raw materials and is considered a strategic product sulfur is an odorless, tasteless and polyvalent nonmetal which is mostly in the form of yellow crystals and is obtained from sulphide and sulphate. Sulphur occurs naturally in the environment and is the thirteenth most abundant element in the earth's crust. It can be mined in its although this method has declined over the last decade to less than 2% of world production. Today most elemental Sulphur is obtained as a co-product recovered from oil and gas production in sweetening process.

BITUMAX is able to supply highest quality Granular or Lump

Packing:

- Bulk In Jumbo Bag
- Bulk

WAX

Semi-Refined Paraffin Wax:

Paraffin wax is a white or colorless soft solid derivable from petroleum, coal or oil shale, that consists of a mixture of hydro carbon molecules containing between twenty and forty carbon atoms

Grade:

- M2: Oil Content 2%
- M3: Oil Content 3%
- H3: Oil Content 3%
- UL2: Oil Content 2%

Package:

- Slabs in Carton Box

Fully Refined Paraffin Wax:

Fully Refined Paraffin Wax is a white, cream, yellow or colorless soft solid derivable from petroleum. It is a mixture of hydrocarbon molecules containing between twenty and forty carbon atoms. Below 0.75% oil content is the best and most expensive grade of paraffin wax used in cosmetics and oily papers, it is hard, extra white, odorless, transparent.

Package:

- Slabs in Carton Box

Slack Wax

is used in emulsions, construction board, matches, candles, rust protective products and moisture vapor barriers, polishes, inks, carbon paper and externally can be applied as good dust suppressants or controlled-release agents for various chemical and fertilizers.

- Light: Oil Content 23-31
- Heavy: Oil Content 33

Package:

- Slabs in Carton Box
- Metal Drum
- Flexi Bag

Petroleum Jelly (Vaseline):

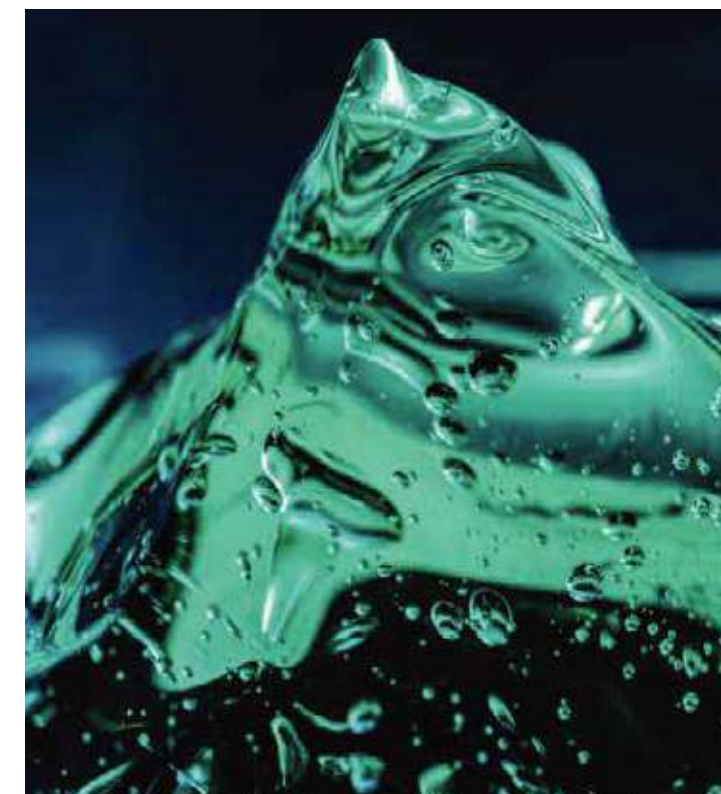

The lighter and thinner oil-based products make up petroleum jelly, also known as white petrolatum or simply as petrolatum. The still residue is then filtered through bone char to yield petroleum jelly.

Grades:

- Petroleum Jelly Grade 500
- Petroleum Jelly Grade 621
- Petroleum Jelly Grade 811

Package:

- Metal drum
- Flexi Bags

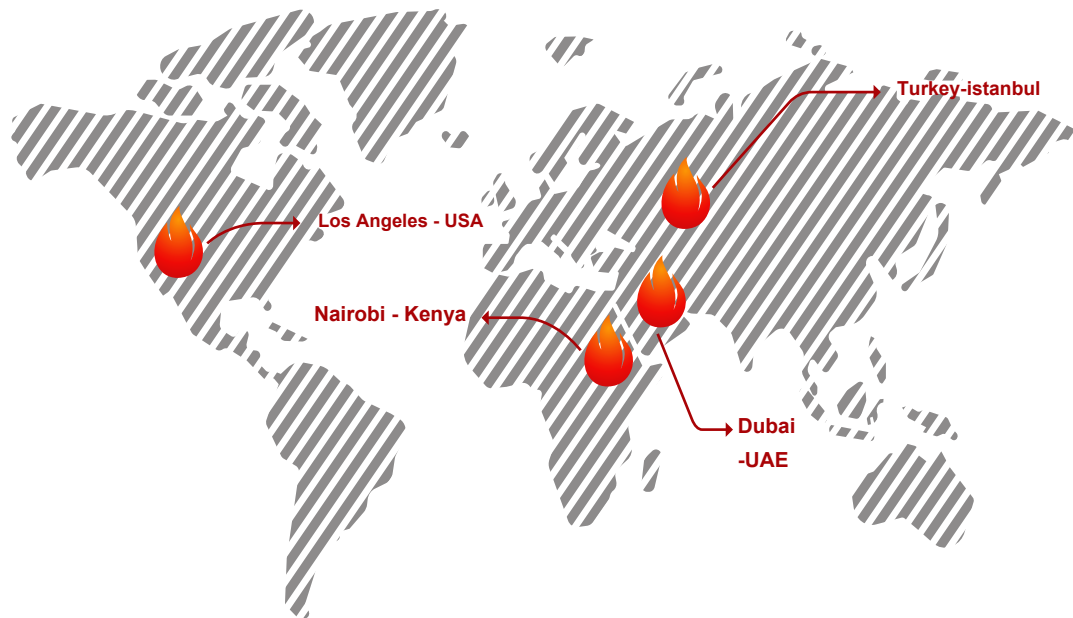

Vision & Mission

Our success in the market is the result of an integrated approach to the company experienced Vision management, including a competent marketing policy, delivering high quality products, well-arranged logistic channels, innovative company developments and expertise staff, all contribute to make us one of the outstanding companies in fields of Chemicals, Petrochemicals & Minerals. Transparency, reliability, and trust are the foundations of our mission for providing high-quality products. We are committed to meeting our customers' needs and exceeding their expectations by providing secure payment options and prompt delivery. As part of our commitment to transparency, we aim to keep our customers informed of the latest market conditions, so they can make informed decisions when placing their orders. We believe that providing this information will help our customers to make the best decisions for their business needs and ensure their long-term success.
